EXPERT REPORT OF CHRISTOPHER TARBELL, May 24, 2024

1

I, Christopher W. Tarbell, provide this expert report concerning the above-referenced matter.

I.

BACKGROUD AND QUALIFICATIONS

1.   The following facts are based on my own personal knowledge, education, and experience. If called as a witness, I will testify to the truth of the declared facts under oath.

2.   I am a former FBI agent and a co-founding partner at Naxo Labs, LLC ("NAXO"). I regularly provide expert advice regarding computer and network security and how to respond to cyber incidents.

3.   From 2015 to 2022, I was a Director at Berkeley Research Group, LLC ("BRG"). From 2014 to 2015, I was a Managing Director at FTI Consulting, Inc.'s ("FTI") Global Risk and Investigations Practice. My focus at both BRG and FTI was cyber security.

4.   From 2005 to 2014, I was a Special Agent with the Federal Bureau of Investigation ("FBI"). I was trained and certified by the FBI as a computer forensic examiner and was member of the FBI's Computer Analysis Response Team ("CART"), which focused on cyber matters. My primary responsibility was to conduct criminal investigations into computer and network intrusions, which also involved the retrieval and forensic examination of computer-related evidence.

5.   During my career at the FBI, I worked on nearly 100 criminal and national security investigations that involved the recovery and forensic analysis of electronic evidence as well as the investigations of computer artifacts from cyber intrusions.

6.   I earned a Master of Science degree in Computer Science from James Madison University in 2004, with a concentration in information security.

7.   I have been certified as an FBI CART Forensic Examiner for both criminal and national security cases. Those certifications were in the Windows and Linux operating systems, along with mobile devices.

8.   I have been certified by leading forensic software providers in the utilization of their forensic tools. For example, I have been certified by Guidance Software as an EnCase Certified Examiner and by AccessData as an AccessData Certified Examiner.

9.   I have also been certified as a Forensic Computer Examiner with the International Association of Computer Investigative Specialists ("IACIS").

10.   I have previously testified as a government computer forensics expert in *United States of America v. Munoz*, Case No. 11-CR-167 (JRT/AJB) in the United States District Court for the District of Minnesota and *United States of America v. Berger, et al*., Case No. 08-CR-00022 (LC/EMT) in the United States District Court for the Northern District of Florida, both criminal matters. I have also testified as both a computer forensics and computer intrusion expert in *United States Securities and Exchange v. Chad C. McGinnis, et al*., Civil Action No. 5:14-CV-6 in the United States District Court of Vermont. A copy of my Curriculum Vitae is attached as Attachment 1 to this report.

II.

SCOPE OF REPORT

11.   I have been retained as a cyber-security expert in the above-captioned case by counsel on behalf of the plaintiff, Farhad Azima ("Azima").

12.   I was retained to opine on two issues: (1) when many gigabytes of Azima's data became available online to the public to access and review and (2) whether certain documents identified by Azima as his trade secrets are contained within three distinct data sets of Azima's stolen data that was downloaded or disseminated at various points in time. The data I analyzed to respond to the second issue included: (1) data that was posted online on the WeTransfer website that I downloaded from that website in 2018 ("2018 WeTransfer Download"), (2) data the Defendants produced to Azima in this litigation ("Defendants' Data"), and (3) data the FBI produced to Azima in this litigation ("FBI's Data") (collectively, "Third-Party Data").

13.   In forming the opinions described in this Report, I considered documents and other materials, which are listed in Attachment 2.

14.   I reserve the right to supplement or amend my opinions in light of additional evidence, testimony, or information that may be provided to me after the date of this report. I also reserve the right to supplement or amend my opinions in response to any further expert reports. I expect that I may be called as a witness. If that occurs, I may produce or assist in producing exhibits for trial based on the documentation attached to or described in this report, its exhibits, or any supplemental reports or exhibits.

15.   NAXO is being paid $700 per hour for my work in this matter. My compensation is not contingent on the outcome or resolution of this or any other legal matter.

III.

SUMMARY OF CONCLUSIONS

16.   In December 2016, I examined two websites containing content related to Azima: https://farhadazimascams.blogspot.nl (the "Blogspot Site") and https://exposedfarhadazima.wordpress.com (the "WordPress Site"). At that time, the websites did not contain any links to Azima's data hosted on the WeTransfer file sharing site ("WeTransfer"). In July 2018, I examined the two websites again and located links to Azima's data hosted on WeTransfer.

17.   The vast majority of the 38 trade secrets that Azima has identified (133 files in total) are contained in the Third-Party Data I was asked to review:

   a. Within the Defendants' Data, I found either forensic matches or documents that closely match 28 of the 38 trade secrets identified by Azima. Of the 10 remaining trade secrets, six are related to Azima's contact lists. Versions of Azima's contact lists are included in the Defendants' Data in a different format. For another two trade secrets, I was able to find documents that were different versions but were similar in structure and format to the trade secrets identified by Azima.

   b. Within the 2018 WeTransfer Download I found either forensic matches or documents that closely match 28 of the 38 trade secrets identified by Azima. Of the 10 remaining trade secrets, six are related to Azima's contact list. For another two trade secrets, I was able to find documents that were different versions but were similar in structure and format to the documents identified by Azima.

EXPERT REPORT OF CHRISTOPHER TARBELL, May 24, 2024

5

c. Within the FBI's Data, I found either forensic matches or documents that closely match 28 of the 38 trade secrets identified by. Of the 10 remaining trade secrets, six are related to Azima's contact lists. Versions of Azima's contact lists are included in the FBI's Data in a different format. For another two trade secrets, I was able to find documents that were different versions but were similar in structure and format to the documents identified by Azima.

<div align="center">

IV.

INTRODUCTION

</div>

A.   The Anti-Azima Websites

18.   In August 2016, two websites were created disparaging Azima, one on the website Blogspot and one on the website WordPress. These websites included labels such as "farhad azima exposed," "farhad azima kansas," and "farhad azima usa."

19.   I examined the WordPress Site and Blogspot Site in December 2016. At that time, neither the Blogspot Site nor the WordPress Site included any links to WeTransfer.

20.   I next examined the sites in July 2018, immediately after Azima learned that the sites had been modified to include WeTransfer links that were not part of the sites in 2016. I preserved those sites, which are included with this report.

21.   In July 2018, the Blogspot and WordPress websites contained new "Download" links, which led directly to WeTransfer websites that contained Azima's data, as described in more detail below.

<div align="center">

EXPERT REPORT OF CHRISTOPHER TARBELL, May 24, 2024

6

</div>

B.   WeTransfer

22.   WeTransfer is an internet file transfer service that allows users to share files with other users. WeTransfer describes itself as "the simplest way to send big files."[1] WeTransfer is widely used and includes both paid and free of charge options to the user.

23.   WeTransfer is a private and secure means of storing and transmitting large quantities of data. Sending large quantities of data via email attachment is often difficult due to user restrictions on the size of emails that can be sent or received. WeTransfer provides an alternative way to send such data securely. Data sent via WeTransfer is secure and private, accessible only to the sender and recipient of the WeTransfer link. Third parties can only access data on WeTransfer if a party hosting data on the platform provides an access link.

24.   WeTransfer users that want to share files ("Sharing Users") first upload their files to WeTransfer servers. The Sharing User creates and shares a Uniform Resource Locator ("URL") link when they want to allow recipients to download the files that they have saved on the WeTransfer platform.

25.   Data that is uploaded to WeTransfer remains secure and private and is not available to the public. Data only becomes available to others when the Sharing User sends links to the data to others or the link is published online.

26.   WeTransfer takes precautions to ensure that data placed on its servers is not detectable by an internet search.

---

[1] WeTransfer. "Hey there, big file mover." https://wetransfer.com/explore

C.   Third-Party Data

27.   I reviewed and conducted searches across three sets of Third-Party Data to determine whether Azima's identified trade secrets were present in the 2018 WeTransfer Download, Defendants' Data, and the FBI's Data.

28.   The first set of data I reviewed is the 2018 WeTransfer Download, which I downloaded and preserved on July 13, 2018.

29.   I also reviewed a data set that the Defendants produced to Azima on or around August 2023. Along with this data set, I reviewed a Transmittal Letter from Defendants' counsel dated August 8, 2023. This data is referred to as the Defendant's Data in this report.

30.   Finally, I reviewed a data set that the FBI produced to Azima in this litigation. I also reviewed an FBI FD-1057 dated February 3, 2017, which indicates the data set was given to the FBI on January 23, 2017. This data is referred to as FBI's Data in this report.

IV.

ANALYSIS

A.   In December 2016, there were no links to WeTransfer posted on the Blogspot Site or WordPress Site

31.   The Blogspot Site and the WordPress Site appear to have been created in August 2016. I examined these websites in December 2016. These websites included labels such as "farhad azima exposed," "farhad azima kansas," and "farhad azima usa." As of December 2016, neither the Blogspot Site nor the WordPress Site included any links to WeTransfer.

B.   In July 2018, the Blogspot Site and WordPress Site both contained new links to WeTransfer sites that housed Azima's data

32.   On or about July 10, 2018, Azima's counsel notified me that they had learned from opposing counsel in litigation in the United Kingdom that Azima's data was available online.

33.   On July 13, 2018, I examined the websites and determined that certain posts had been modified to include new links to Azima's data. I preserved the posts that had been modified, specifically:

a.   https://farhadazimascams.blogspot.com/2016/08/farhad-azima-ceo-of-aviation-leasing.html ("Blogspot Post 1"),

b.   https://farhadazimascams.blogspot.com/2016/08/farhad-azima-and-his-associate-ray.html ("Blogspot Post 2"), and

c.   https://exposedfarhadazima.wordpress.com/2016/08/08/farhad-azima-farhad-azima-scammer/" ("WordPress Post")

34.   Blogspot.com is a domain that is used to access Google hosted blogs on its content management system Blogger. Blogs are websites that users can create with their own content. In other words, blogspot.com allows users to publish web content without owning or hosting their own website.

35.   A blog posted through Blogger on blogspot.com has a URL that directs users to the content. A blog post that has a permanent address has a permalink URL. "When you create a post in Blogger, the generated permalink has a specific format that includes the publication date."[2]

---

[2] GuideBlogging. "How to Remove or Hide Data from Blogger Post URL in 2024? (Steps by Steps Guide)." https://guideblogging.com/remove-date-from-blogger-post-url

36.   On July 13, 2018, I examined Blogspot Post 1 and Blogspot Post 2 with a standard internet browser, Mozilla Firefox. I saved Blogspot Post 1 to portable document format ("pdf") and attached to this report as Attachment 3. I saved Blogspot Post 2 to pdf and attached to this report as Attachment 4.

37.   Mozilla Firefox "Page Info window gives [the] technical details about the page"[3] the browser is currently displaying. "The General panel includes basic information about the page such as its title, address, and content type, as well as more technical data from the page source" such as "Modified: Displays the date and time the page was last changed."

38.   Using Mozilla Firefox Page Info, I saved the Page Info for both Blogspot Post 1 (Attachment 5) and Blogspot Post 2 (Attachment 6).

39.   Mozilla Firefox allows users to View Source, "look at the HTML or XML source for the page"[4] that is currently being viewed with the browser.

40.   Using Mozilla Firefox View Source, I saved the Page Source for both Blogspot Post 1 (Attachment 7) and Blogspot Post 2 (Attachment 8).

Blogspot Post 1

41.   The URL for Blogspot Post 1, https://farhadazimascams.blogspot.com/2016/08/farhad-azima-ceo-of-aviation-leasing.html, contains the publication date "2016/08."

---

[3] Mozilla. "Firefox Page Info Window." https://support.mozilla.org/en-US/kb/firefox-page-info-window.

[4] Mozilla. "View Source." https://firefox-source-docs.mozilla.org/devtools-user/view_source/index.html.

42.   Blogspot Post 1 lists that it was "Posted by crimeboard" from the "Location: Dubai – United Arab Emirates."

43.   As seen in Attachment 3, at the top of the blog, the listed date is "Sunday, August 7, 2016." This date matches the URL publication date. This suggests that the blog post was first created on August 7, 2016. It does not provide information about the content included in the post on that creation date or any subsequent modification.

44.   Blogspot Post 1 also contains a comment by user "Anonymous" that was added to this blog post on "September 23, 2016 at 3:50 AM." This comment was the URL "http://farahdazimascams.blogspot.de/2016/08/fraud-between-farhad-azima-and-jay.html." The top-level domain ("TLD")[5] for this link is ".de," which is the TLD for Germany.

45.   The Page Info for Blogspot Post 1, as seen in Attachment 5, indicates that this page was "Modified" on "Tuesday, June 12, 2018, 3:36:28 AM." This suggests that the blog was modified on June 12, 2018, but it does not provide information about what was modified.

46.   The page source data for Blogspot Post 1, as seen in Attachment 7, contains the HTML code:

> <a class='timestamp-link'
> href='https://farhadazimascams.blogspot.com/2016/08/farhad-azima-ceo-of-aviation-leasing.html' rel='bookmark' title='permanent

---

[5] A top-level domain is the highest level in the Domain Name System for the Internet, the root zone for the name space. Other examples of top-level domains include .com, .edu, and .gov.

link'><abbr class='published' itemprop='datePublished' title='2016-08-07T22:47:00-07:00'>10:47 PM</abbr>

47.   On a sidebar of Blogspot Post 1 there are four URL links and titles to blogs posted under the URL "https:// farhadazimascams.blogspot.com/2016/08/", which can also be found in page source data Blogspot Post 1:

    a.   https://farhadazimascams.blogspot.com/2016/08/farhad-azima-ceo-of-aviation-leasing.html (Blogspot Post 1)

    b.   https://farhadazimascams.blogspot.com/2016/08/farhad-azima-caught-up-in-fund-raising.html, titled "Farhad Azima caught up in Fund Raising Scandal"
https://farhadazimascams.blogspot.com/2016/08/farhad-azima-and-his-associate-ray.html (Blogspot Post 2)

    c.   https://farhadazimascams.blogspot.com/2016/08/fraud-between-farhad-azima-and-jay.html, titled "Fraud between Farhad Azima and Jay Solomon"

These links are posted under the headings "2016" and "August."

48.   In the body of Blogspot Post 1 there is a URL link titled "Download" with the link pointing at "https://we.tl/G2v9igEB4i." This URL link is in both Attachment 3 and Attachment 7. This URL link directs to WeTransfer. In general, the URL "we.tl" redirects to WeTransfer.

49.   The WeTransfer links, which were not present in the December 2016 examination of blog posts referencing Azima, were present in the July 2018 examination of Blogspot Post 1.

Blogspot Post 2

50.   The URL for Blogspot Post 2, https://farhadazimascams.blogspot.com/2016/08/farhad-azima-and-his-associate-ray.html, contains the publication date "2016/08."

51.   As seen in Attachment 4, at the top of the blog, the listed date is "Thursday, August 11, 2016." This date matches the URL publication date. This suggests that the blog was first created on August 11, 2016. It does not provide information about the content included in the post on that creation data or any subsequent modifications.

52.   The Page Info for Blogspot Post 2, as seen in Attachment 6, indicates that this page was "Modified" on "Tuesday, June 12, 2018, 3:36:28 AM." This suggests that the blog was modified on June 12, 2018, but it does not provide information about what was modified.

53.   The page source data for Blogspot Post 2, as seen in Attachment 8, contains the HTML code:

> <abbr class='published' itemprop='datePublished' title='2016-08-11T23:30:00-07:00'>11:30 PM</abbr>

The sidebar of Blogspot Post 2 contains the same four URL links in the sidebar of Blogspot Post 1.

54.   The body of Blogspot Post 2 contains two URL links. The first title and same URL link is "http://1337x.to/torrent/1696317/FARHAD-AZIMA-OF-THE-

AVIATION-LEASING-GROUPEXPOSED/." The second URL link is titled "Download" with the link pointing at "https://we.tl/G2v9igEB4i." These URL links are in both Attachment 4 and Attachment 8. The "Download" link is the same link found in Blogspot Post 1.

55. I identified WeTransfer links to Azima's data on Blogspot Post 2 in July 2018. Those links were not present when I examined that site in December 2016.

WordPress Post

56. On July 13, 2018, I examined WordPress Post with a standard internet browser, Mozilla Firefox. I saved WordPress to pdf and attached it to this report as Attachment 9.

57. Using Mozilla Firefox View Source, I saved the Page Source for WordPress Post and attached it to this report as Attachment 10.

58. A blog posted through wordpress.com may include dates within the URL. "By default, [wordpress.com] doesn't include dates in its URLS…If your URLs contain dates, it's because someone selected that option."[6]

59. The URL for WordPress Post, https://exposedfarhadazima.wordpress.com/2016/08/08/farhad-azima-farhad-azima-scammer/, contains the publication date "2016/08/08."

60. The dates "August 8, 2016" and "January 28, 2017" appeared near the top of WordPress Post, as seen in Attachment 9.

---

[6] WP Engine. "Why There Are Dates in WordPress URLs." https://wpengine.com/resources/how-to-remove-the-date-from-a-wordpress-url/

61.   The page source data for the WordPress Post, as seen in Attachment 10, for these dates contains the HTML code:

> <time class="entry-date published" datetime="2016-08-08T11:01:04+00:00">August 8, 2016</time><time class="updated" datetime="2017-01-28T00:28:46+00:00">January 28, 2017</time>

62.   The page source data for WordPress Post also contains the HTML code:

> <meta property="article:published_time" content="2016-08-08T11:01:04+00:00" />
>
> <meta property="article:modified_time" content="2017-01-27T20:28:46+00:00" />

63.   The Page Info, as seen in Attachment 11, has "article:published_time" set to "2016-08-08T11:01:04+00:00." This suggests that the blog post was first created on August 8, 2016. It does not provide information about the content included in the post on that creation date.

64.   WordPress Post contains eight URL links and titles to blog posts:

   a. Titled "farhad azima" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima/"

   b. Titled "farhad azima exposed" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-exposed/"

   c. Titled "farhad azima fraud" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-fraud/"

d. Titled "farhad azima Iranian Born charter" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-iranian-born-charter/"

e. Titled "farhad azima kansas" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-kansas/"

f. Titled "farhad azima scam" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-fraud/farhad-azima-scam/"

g. Titled "farhad azima usa" with the URL "https://exposedfarhadazima.wordpress.com/category/farhad-azima-usa/"

h. Titled "Ray Adams" with the URL "https://exposedfarhadazima.wordpress.com/category/ray-adams/"

65.   WordPress   Post   contains   a   URL   link   titled   "Download (https://we.tl/G2v9igEB4i)" with the link pointing at "https://we.tl/G2v9igEB4i," the same URL found in Blogspot Post 1 and Blogspot Post 2.

66.   I identified WeTransfer links to Azima's data on the WordPress Post in July 2018. Those links were not present when I examined that site in December 2016.

WeTransfer Links

67.   On July 13, 2018, I examined the WeTransfer link found in Blogspot 1, Blogspot 2, and WordPress, "https://we.tl/G2v9igEB4i," with a standard internet browser, Mozilla Firefox.   This URL redirected to the WeTransfer URL https://wetransfer.com/downloads/e5cc80815dd9b6720eb3ee131a0e3bc12017012717

2710/3b327c ("WeTransfer 1"). I saved WeTransfer 1 to pdf and attached to this report as Attachment 12.

68.   WeTransfer 1 contained the text file "FarhadExposed.txt" that lists ten WeTransfer links:

    a. fazima@gmail.com.rar : https://we.tl/rjSE40WBdr

    b. HH@fathers.church.rar : https://we.tl/tfXwVwB3Gm

    c. farhad@farhadazima.com.rar : https://we.tl/Gka4MUy7zD

    d. farhadazima@yahoo.com.rar : https://we.tl/KL54ZDnqDR

    e. fa@alphaavia.com.rar : https://we.tl/t3ztasxtb4

    f. fa@fa1.us.rar : https://we.tl/CusUhgXFpb

    g. farhadusa@me.com.rar : https://we.tl/1NzVBRzP3F

    h. ray@jfjintl.com.rar : https://we.tl/L9hkgARQaH

    i. cfo@globalsubdive.com.rar : https://we.tl/vmYV2Lq6FF

    j. ray.adams@algkc.com.rar : https://we.tl/Nom1cpvP9f

69.   On July 13, 2018, I examined each of the above WeTransfer links and downloaded the content. These links contained the .rar files listed above. Sampling these .rar files, the contents appear to relate to the email accounts included in the name of the .rar files (i.e., fazima@gmail.com.rar appears to be a collection of received and sent emails associated with the email account fazima@gmail.com). I downloaded this data and provided it to Azima's counsel in July 2018.

C.   The vast majority of Azima's identified trade secrets are contained within the Third-Party Data I reviewed.

70.   I compared Azima's 38 identified trade secrets against the Third-Party Data by collecting the three data sets in a database and running searches. I compared

---

the "digital fingerprint" (a hash value of the content of a data file) for each file in Azima's identified trade secrets to the "digital fingerprint" of the files in the Third-Party Data. After finding numerous forensic matches, I searched and compared the remaining files by file types and search strings across data content to identify matching files. These additional searches resulted in my identifying many more of Azima's identified trade secrets in the Third-Party Data.

71. An MD5 message-digest algorithm is a hash function that produces a 128-bit hash value, like a digital fingerprint for a file. Changing just one bit of data within a file will cause that file to have a completely different MD5 hash value. If two files have matching MD5 hash values, those files are a forensic match.

72. Even if two files do not have matching MD5 hash values, they may still contain nearly the same content, but they would not be considered a forensic match.

73. The 2018 WeTransfer Download contained 278 files that match documents within Azima's identified trade secret files, including family members. The 278 matching files contain 187 files with a matching MD5 hash and 91 matching files that are slight variations of the identified files, such as an email with a reply attached or an email that was forwarded with the same attachment(s). The 2018 WeTransfer Download contains either forensic matches or documents that closely match 28 of the 38 trade secrets identified by Azima. Attachment 13 is a listing of the Azima identified trade secret files with found in the Third-Party Data.

74. The Defendants' Data contains 256 files that match documents within Azima's identified trade secret files, including family members. The 256 matching files contain 186 files with a matching MD5 hash and 70 matching files that are slight variation of the identified files. The Defendants' Data contains both forensic matches

of documents and documents that closely match 28 of the 38 trade secrets identified by Azima.

75.   The FBI's Data contains 280 files that match documents within Azima's identified trade secret files, including family members. The 280 matching files contain 187 files with a matching MD5 hash and 93 matching files that are slight variations of the identified files. The FBI's Data contains either forensic matches or documents that closely match 28 of the 38 trade secrets identified by Azima.

76.   There were 10 of the 38 identified trade secret families that I was not able to find as full matches in any of the substantive files in the Third-Party Datasets: TS01, TS02, TS04, TS20, TS21, TS26, TS27, TS28, TS29, and TS30.

77.   Six of these documents (TS20, TS21, TS26, TS27, TS28, and TS29) are different versions of a contact list. Two of the documents are .csv[7] files collected from Azima's yahoo email accounts, as indicated by the Custodian and File Name in the metadata. Four of the documents are .xlsx[8] files of contacts extracted from Azima's iPad and iPhones, as indicated by the Custodian and File Path information contained in the metadata. These formats are how I would expect a contact list collected directly from a webmail account (.csv) or from a cell phone or table (.xlsx) to be saved when extracted by specialized software. Though I did not find these .csv files and .xlsx files in any of the Third-Party Datasets, there are collections of contact information contained   in   the   Defendants'   Data   and   the   FBI's   Data   at

_____

[7] A comma-separated values ("CSV") file is a text file that uses commas to separate values in a list or table. These commas allow software, such as Microsoft's Excel, to place the values into individual cells.

[8] A Microsoft Excel Open XML Spreadsheet ("XLSX") is a spreadsheet created by Microsoft Excel.

DEFS(MDNC20cv954)_0000276 through DEFS(MDNC20cv954)_0008108 and FA_MDNC_ZUKAS_00960813 through FA_MDNC_ZUKAS_00968827, respectively, the content of which overlaps with Azima's identified trade secrets.[9] These contacts are saved as thousands of individual vCards. This format is consistent with how I would expect native contact records to be extracted and saved from a webmail account, an iPad, and an iPhone. Finally, while the 2018 WeTransfer Download contains a small number of vCards, it did not include a collection of contact information or vCards.

78.   For two additional documents identified by Azima as trade secrets (TS01 and TS02), I was unable to locate identical documents in the Third-Party Data. However, I was able to find similar financial forecasts that were different versions produced in different years. For example, TS01 is a HeavyLift International Airlines Seven-Year Financial Forecast, dated August 5, 2010. I was able to find a HeavyLift International Airlines Seven-Year Financial Forecast, dated August 10, 2006.

V.

CONCLUSIONS

79.   In July 2018, the Blogspot Site and WordPress Site both included WeTransfer links that provided access to approximately 27 gigabytes of Azima's data through 10 .rar files. July 2018 was the first time I was able to access those documents. When I previously examined the Blogspot Site and WordPress Site in December 2016, the sites did not include any links to WeTransfer, and Azima's data was not available.

---

[9] The FBI's Data collection of contact information was extracted from Farhad Azima contacts folder as indicated by the File Path in the metadata.

In July 2018, I downloaded and preserved the data that was available on the WeTransfer links.

80.   I have reviewed Azima's 38 identified trade secrets. I have compared those identified trade secrets with documents in three sets of Third-Party Data: the 2018 WeTransfer Download, Defendants' Data, and FBI's Data. In the Third-Party Data, I have found full matches (forensic and non-forensic) for 28 of the 38 documents identified as trade secrets. Six of the 10 documents for which I did not find full matches in the Third-Party Data are contact lists, and as explained above, those contact lists are in the Defendants' Data and FBI's Data in a different format. For two additional documents, I was able to locate similar forecasts but not full matches.

I declare under the penalty of perjury under the laws of the United States of America that the foregoing is true and correct to the best of my knowledge.

Executed this 24ᵗʰ day of May 2024 in Augusta County, Virginia.

Dated: May 24, 2024

NAXO

A former FBI Special Agent, Chris Tarbell specializes in cyber investigations and incident response. As a case agent with the FBI's preeminent cybercrime squad in New York, he led some of the most groundbreaking cybercrime investigations in the world - including the arrest and prosecutions of Anonymous and LulzSec leadership, and the founder of the notorious Silk Road underground marketplace, the latter of which resulted in the largest seizure of bitcoins to date.

As a computer forensic examiner with the FBI, Chris engaged in rapid-response investigations all over the world on matters related to terrorism, botnets, and other cybercrimes. In 2009, Chris joined the FBI's renowned cybercrime squad as a Special Agent in the New York field office. He was the lead investigator on several of the Bureau's most complex and cutting-edge cases, including the takedown of the billion-dollar, cryptocurrency-based drug marketplace "Silk Road" and the arrest of its founder, and the investigation and arrest of the leadership of the Anonymous/LulzSec hacking crews.

Prior to co-founding NAXO, Chris developed and led the Cyber Operations & Incident Response practice for a large consulting firm. He has extensive experience helping businesses, high-profile individuals, and governments respond to a broad range of complex computer and network security threats. He is also regularly called on to advise foreign and domestic law enforcement officers on investigative techniques, and frequently lectures to business and government groups, including EUROPOL, on cyber threats and the means to address them.

Chris holds an MS in Computer Science from James Madison University with a concentration on Information Security. He has been certified by both the FBI and the International Association of Computer Investigative Specialists (IACIS) as a Certified Forensic Computer Examiner (CFCE). He has also been certified by the FBI as a subject-matter expert on cellphones and other mobile computing devices, and the Windows and Unix/Linux operating systems. Chris has been qualified in federal court as an expert witness in computer forensics, providing expert testimony in multiple federal criminal trials.

EDUCATION

M.S., COMPUTER SCIENCE
James Madison University, 2004

B.S., HEALTH SCIENCE
James Madison University, 2000

CERTIFICATIONS

AccessData Certified Examiner

Certified Forensic Computer Examiner - International Association of Computer Investigative Specialist

EnCE Certified Examiner

FBI Computer Analysis Response Team Forensic Examiner - Wintel, Linux, and Mobile Devices

PRIOR EXPERIENCE

BERKELEY RESEARCH GROUP   New York, NY
Director, Cyber Operations & Incident Response
December 2015 – June 2022

- Co-created and developed BRG's Cyber Operations & Incident Response practice focused on responding to cyber security incidents for clients including financial institutions, cryptocurrency hedge funds and custodians, and private individuals.
- Conducted network security assessments and provided expert advice regarding cybersecurity best practices.
- Led investigations related to cyber intrusions, insider threats, ransomware, and other criminal activity; provided computer forensic examinations and expert testimony connected to these matters.

FTI CONSULTING   New York, NY
Managing Director, Cyber Security & Investigations
March 2014 – December 2015

- Led computer and network forensic investigations for a wide range of clients, including large multinational corporations, financial institutions, and the U.S. Government.
- Performed forensic evidence collection and analysis in response to breaches of client systems and networks by external threats or theft of proprietary information by corporate insiders.
- Conducted vulnerability assessments, including proactive penetration testing and cybersecurity policy review.

FEDERAL BUREAU OF INVESTIGATION   New York, NY
Special Agent, Cyber Division
March 2009 – March 2014

- Assigned to a criminal computer intrusion squad, conducted investigations of national and international cyber intrusions, hactivism, and computer criminals.
- Created and maintained effective liaison relationships, developed and managed confidential human sources, and collaborated with the United States Attorney's Office on prosecutions.
- Conducted physical and electronic surveillance, collected evidence, monitored online activities, and gathered and analyzed data.
- Coordinated law enforcement raids, searches, seizures, and arrests.

FEDERAL BUREAU OF INVESTIGATION   Quantico, VA
Computer Forensic Examiner
May 2005 – March 2009

- Certified computer forensic examiner with the FBI's Computer Analysis Response Team (CART) to provide expert testimony and support to FBI criminal and national security investigations.
- Examined physical evidence under a documented quality assurance program, in an ASCLD/ISO certified laboratory, that included annual proficiency testing, technical/peer and administrative reviews, and adherence to standard operating procedures.
- Conducted forensic examination on computer evidence, carried out research and development activities, performed search and seizure operations, and provided Instructional training to new field examiners.

STAUNTON POLICE DEPARTMENT   Staunton, VA
Police Officer
February 2003 - April 2005

- Served as a sworn officer to uphold the laws of the Commonwealth of Virginia and the city code of Staunton, VA.
- Conducted criminal investigations and provided criminal court testimony.

JAMES MADISON UNIVERSITY   Harrisonburg, VA
System Administrator / Program Support
January 2000 - April 2005

- Provided IT support for the JMU Police Department, evaluated and advised all computer needs and purchases, computer networking, computer/data security, webmaster and site designer, and database management.
- Assist JMU Police Department Investigations Unit with deployment and collection of technical assets and the recovery of electronic evidence.

EXPERT TESTIMONY

- Securities and Exchange Commission v. Chad C. McGinnis, et al.; United States District Court of Vermont; Civil Action No. 5:14-CV-6. Three expert reports, two depositions, and expert analysis of plaintiff's trial exhibits and expert testimony. Analysis identified two fabrications in the plaintiff's expert testimony.

- A. Doe, et al., v. Sutherland Healthcare Solutions Inc., et al.; Superior Court of the State of California for the County of Los Angeles; Case No. BC539436. Expert report and deposition in relation to data theft litigation. Included on-site collection and analysis of computer forensic evidence and physical evidence.

- United States of America v. Berger, et al., Senior District Judge L.A. Collier, United States District Court Northern District of Florida, Case No. 08-CR-00022 (LC/EMT). Criminal child pornography litigation. Conducted full forensic examination of computer evidence, produced an expert report, and testified in court.

INSTRUCTOR / PROCTOR

- FBI CART Basic Wintel Certification Training, Internet Processing – Practicals, Justice Training Center in Stafford, VA

- FBI CART Basic Wintel Certification Training, Internet Processing – Practicals, Justice Training Center in Stafford, VA

- FBI CART Moot Court, Phoenix, AZ

- FBI CART Forensic Examiner Coach for a CART Forensic Examiner in Training

- FBI CART Moot Court, Nashville, TN

- FBI CART Basic Wintel Certification Training – Practicals, Justice Training Center in Fredericksburg, VA

NAXO

REPRESENTATIVE MATTERS

COMPLEX INVESTIGATIONS

Digital forensics, insider threats, and litigation support

- Provide technical and investigative support to a US federal law enforcement agency in connection with darknet-related criminal investigations. Assistance includes deployment and configuration of specialized hardware as well as training and consulting services.

- Retained as an expert on behalf of plaintiffs in a class action lawsuit against a healthcare services company to conduct an independent investigation of a data security breach. Collected and forensically analyzed computer and physical evidence and compiled an expert report.

- Retained to investigate a ransomware attack on a healthcare services company. Analyzed millions of files seeking to determine whether protected health information (PHI) may have been stolen in connection with the breach.

- Retained as a computer forensic expert by a US regulatory agency to examine, analyze, and potentially testify to digital artifacts related to a civil action in federal court.

- Investigated a data breach at a foreign educational institution in which the threat actor leaked confidential documents to local newspapers. Traveled on-site to analyze forensic evidence and conduct interviews in order to determine the source of the leak.

- Retained by a global industrial power tools manufacturer in response to claims that an employee group had deployed unauthorized network infrastructure at an off-site location. Interviewed company employees and assisted with technical reconnaissance of the location, which identified unauthorized wireless networks on company property.

- Engaged by legal counsel to locate highly sensitive data that was being concealed. Identified the location of the data through multiple interviews and technical investigation. Once located, carried out a Congressional subpoena to ensure the data was forensically preserved, documented, and collected.

- Investigated a data theft incident involving an international media company. Successfully identified the perpetrator and their methodology; provided the client with recommendations to prevent further theft of data.

- Retained by an international electrical power transmission system operator to investigate an insider threat suspected to be a Nation-State actor exfiltrating highly sensitive data. The investigation revealed multiple insider threats and resulted in a federal law enforcement referral.

- Retained by a Fortune 500 company that was concerned about the safety of its highly sensitive intellectual property. Identified an employee who was actively stealing thousands of documents and facilitated a law enforcement referral that resulted in a national security investigation and an arrest.

- Engaged by counsel on behalf of a large accounting firm to investigate a possible insider threat. Collected, documented, preserved, and examined digital evidence and created a detailed timeline of suspicious activities. Presented findings to the firm's board of directors which resulted in the individual's termination.

- Retained through counsel by an individual who was accused of insider trading by the SEC. Provided forensic analysis, expert opinions, and sworn testimony that identified flaws in key evidence presented by the prosecution. My work resulted in a victory for the defendant.

- Investigated threatening emails sent to employees of a leading pediatric nutrition company. Identified an insider threat by analyzing tens of thousands of emails, reviewing log files, and conducting employee interviews.

- Retained as an investigative expert by a website that provides community-based classified ads in connection with a web scraping allegation against a competitor in civil court. Conducted interviews with the company's employees and analyzed web server logs to approximate the extent of the web scraping and assess its impact on the website's IT infrastructure.

CYBER SECURITY

Incident response and network assessments

- Provided periodic cyber security assessments for a billion-dollar travel company. Conducted in-person interviews with key personnel to assess compliance with data security policy, evaluated physical security of cyber assets, summarized findings as part of a comprehensive report, and provided prioritized recommended security improvements. Presented our team's findings to the company's board of directors and subsequently provided ongoing strategic cybersecurity guidance to C-suite executives.

- In the aftermath of a serious security incident, performed a cyber risk assessment for a Fortune 500 healthcare company to evaluate compliance with the New York State Department of Financial Services (NYDFS) Cybersecurity Requirements for Financial Services Companies. Conducted in-person interviews with key staff, compiled detailed findings and recommendations into a comprehensive report, and provided ongoing support for the firm's IT team as it implemented our recommendations.

- Responded to a cyber-attack on a global law firm. Conducted technical analysis of network log files, which helped reveal that the threat actor was an adverse party to an ongoing criminal matter being handled by the firm. Following our investigation, helped facilitate a federal law enforcement referral conducted a network security, and helped remediate gaps in the firm's cyber security posture.

- Retained by a U.S. company to investigate and examine business email and data storage access by employees, former employees, and outside entities.

- Responded to an attack on a New York-based theater's website that resulted in malicious content being embedded on a certain web page. Analyzed web access logs as well as open-source intelligence sources related to the malicious content to establish whether the attacker was likely an insider. Provided detailed recommendations for improvements to the theater's cyber security posture.

- Retained by an individual who was targeted by a foreign country and fell victim to multiple State-Sponsored cyber intrusions. Investigated and provided evidence detailing the specific accounts that had been compromised.

- Retained by a Colorado-based car dealership to conduct technical penetration testing and vulnerability assessments of its IT infrastructure, which included wireless access points installed throughout the company's campus. Identified numerous vulnerabilities and a provided prioritized list of recommended remediations.

- Performed an independent network security assessment and penetration test for a New York-based consulting firm. Provided a report that included prioritized recommendations and assisted in implementing fixes of critical vulnerabilities.

- As a special agent in the FBI, conducted numerous criminal investigations into cyber attacks on US entities in a range of industries, including healthcare, finance, travel, entertainment, technology, media, and government.

In forming the opinions described in my Report, I considered the following documents and other material:

1. Archives of blogs that I collected on July 13, 2018. (FA_MDNC_01027286 to FA_MDNC_01027342)

2. Archive of WeTransfer.com file shares I collected on July 13, 2018. (FA_MDNC_01196422 to FA_MDNC_01960223)

3. Data the Defendants produced to Azima in this litigation. (DEFS(MDNC20cv954)_0000276 to DEFS(MDNC20cv954)_0763967)

4. A Transmittal Letter dated August 8, 2023, for the data the Defendants produced.

5. Data the FBI produced to Azima in this litigation. (FA_MDNC_ZUKAS_00000123 to FA_MDNC_ZUKAS_00972405)

6. An FBI FD-1057 dated February 3, 2017, for the data the FBI produced. (FA_MDNC_ZUKAS_00000012 to FA_MDNC_ZUKAS_00000013)

7. Publicly available websites referenced in my report.

8. Data files and other materials identified in my report.

Farhad Azima Exposed Again

Farhad Azima- An Iranian-born KC aviation figure with colorful past.

Sunday, August 7, 2016

Farhad Azima CEO of Aviation Leasing Group - Exposed Again

Farhad Azima was born in 1941. Currently he lives in Kansas City. **Farhad Azima** is chairman for Aviation Leasing Group (ALG).

Farhad Azima found in America's major scandal, the Iran contra affairs and Panama papers. Farhad is Iranian Born and made a career of renting and leasing airplanes. An interesting twist came in his career when he found in the panama papers scandal. **"He had no idea about this. He had nothing to do with Panama, said- Farhad Azima."** He said that he was investigated by every known agency in United States but they didn't find anything wrong there finally they decided there was absolutely nothing there. It was just a wild goose chase.

But I don't think it was just a wild goose chase because including **Farhad Azima** there are some other personalities who have links to intelligence agencies also found in this scandal.
This is his new scam in involvement with some big personality's including his close associates like Ray Adams & Dr. Khater Massaad.

Farhad Azima was born in 1941. Currently he lives in Kansas City. Farhad Azima is chairman for Aviation Leasing Group (ALG).

Farhad Azima found in America’s major scandal, the Iran contra affairs and Panama papers. Farhad is Iranian Born and made a career of renting and leasing airplanes. An interesting twist came in his career when he found in the panama papers scandal. “He had no idea about this. He had nothing to do with Panama, said-Farhad Azima.” He said that he was investigated by every known agency in United

States but they didn’t find anything wrong there finally they decided there was absolutely nothing there. It was just a wild goose chase.

But I don’t think it was just a wild goose chase because including Farhad Azima there are some other personalities who have links to intelligence agencies also found in this scandal.

This is his new scam in involvement with some big personality’s including his close associates like Ray Adams & Dr. Khater Massaad.
